

Wildlife Compensation Program Example

Example:

5 acres of winter feed wheat damaged by geese in the spring. Inspection determines that 50% of the crop was damaged in the affected area.

Calculated compensation:

5 acres X 50% damage = 2.5 acres damaged.

2.5 acres X 4193 kg/acre (provincial average) = 10,483 kg of loss (10.483t)

10.483t X \$325/t X 80% = \$2,725.5

Example

2 ewes are reported lost due to wildlife predation.

Inspection confirms that the loss was caused by coyotes.

Calculated compensation:

2 ewes X \$200 X 80% = \$320.00
